

Dry-Look water-proof sealer for absorbant Unitex textured surfaces

DrySeal is a milk white low viscosity water-based liquid that will provide excellent hydrophobic water pearly/beading effect, forming a physical barrier to water and migration while maintaining substrate breathability. DrySeal is a penetrating type, water-based surface coating sealer that can be spray applied or roller coated over masonry-like absorbent surfaces such as the dry powder based Unitex surface applied texture coatings. Complete and uniform coverage must be provided over the various substrates.

Ask your Unitex Technical Representative for a sample to see DrySeal in action

Quick Product Guide: DrySeal

Size:	15L or 5L
Coverage:	5-15m ² /L
Suitable substrates:	Unitex Dry Textures, Veneto, Uni-Rock and Redi-Texture
Application:	Roll, Brush, Spray
Finish:	No texture change
Colour:	Clear & penetrating
