4. FIRST AID MEASURES

If poisoning occurs, contact a doctor or Poisons Information Centre (in Australia, call 131 126).

Inhalation

Remove victim from area of exposure – avoid becoming a casualty. Remove contaminated clothing and loosen remaining clothing. Allow patient to assume most comfortable position and keep warm. Keep at rest until fully recovered. Seek medical advice if effects persist.

Skin Contact

If skin contact occurs, remove contaminated clothing and wash skin with running water. If swelling, redness, blistering or irritation occurs, seek medical advice.

Eye Contact

If in eyes, wash out immediately with water. In all cases of eye contamination, it is a sensible precaution to seek medical advice.

Ingestion

Rinse mouth with water. If swallowed, do NOT induce vomiting. Give a glass of water to drink. If vomiting occurs, give further water. Seek medical advice. Never give anything by the mouth to an unconscious person.

PPE for First Aiders

Wear overalls, safety glasses and impervious gloves. Available information suggests that gloves made from nitrile rubber should be suitable for intermittent contact. Always wash hands before smoking, eating, drinking or using the toilet. Wash contaminated clothing and other protective equipment before storing or re-using.

Advice to Doctor

Treat symptomatically.

Flammability	Not flammable
Extinguishing media	If material is involved in a fire, use water fog (or, if unavailable, fine water spray), foam, dry agent (carbon dioxide, dry chemical powder).
Hazards from combustion products	Non-combustible material
Special Protective Precautions & Equipment for Fire Fighters	Not combustible. However, following evaporation of aqueous component, residual material can burn if ignited. Fire fighters to wear self-contained breathing apparatus and suitable protective clothing if risk of exposure to evaporated components or products of combustion.
